ABOUT

As the first in my entire family to attend college, I am a driven individual with a strong ability to adapt and grow. Passionate about building clean, good looking, efficient, and responsive web applications. I am extremely curious, love learning new things, and always challenging myself. The type of person who obsesses about getting those CSS details just right. A guy who built a clone of a SaaS web application just to save a few bucks on a membership subscription.

WORK EXPERINCE

Full-Stack Web Developer
Boston Red Sox
02/2021 - PRESENT

- Developed a tool to identify data ingestion issues from various vendors for comprehensive play by play video and stats
- Worked with Analysts to enhance various systems used by scouts and managers to aid in player development and trades

Full-Stack Web Developer
New York State Government
03/2017 - 02/2021

- Collaborated with Google to modernize New York State's aging unemployment application system to support the rapid volume of applications from those affected by COVID-19. Moved from mainframes and rebuilt the frontend with Angular 9.

- Worked as frontend lead on a COVID-19 screening application used by all New York State employees to help maintain a safe workplace. Angular 9 frontend.

- Developed Nourish NY, a web portal allowing farmers to donate surplus products that would otherwise expire to food banks. Angular 9 frontend, ASP.NET MVC Core backend.

- Developed and maintained an internal and external Freedom of Information Law system for requesting government records.
